MISSION STATEMENT

Advance Facilities Group is an ethical and responsible business. Our approach to all sustainability matters, is very much holistic and we recognise the importance of responsible and sustainable working practices.

We remain committed to our sustainable development goals strategy (SDGS) most material to our business. Each of these goals acts as a blueprint for our sustainability strategy going forward.

We believe success can only be built on responsible business practices, such as integrity, respect, honesty, service and excellence.

CORE VALUES

CUSTOMER PERFORMANCE

We are driven to meet our customers Key Performance Indicators and committed to continue to improve our performance for our customers, alongside building long-term trusted relationships.

OPEN COMMUNICATION

We value clear and consistent communication with each other, with clients and with our supply chain. We recognise that open and honest communication is the foundation to customer growth.

TEAMWORK

We align our individual and team goals with the overarching objectives of the organisation and work towards the same mission. We believe that true success is achieved when individuals come together, share their diverse perspectives, and work toward a common goal.

SUSTAINABILITY & ENVIRONMENTAL

At Advance, concern for the environment and promoting a broader sustainability agenda are integral to everything we do. We follow and promote the best possible sustainability practice, to reduce the environmental impacts of all our activities and to help our clients and partners to do the same.

We are 100% committed to recycling and/or re-using material wherever possible and for every piece of work that we do, we monitor and manage our use/generation of energy, water, resources, transport, emissions, waste, and contamination.

THE GREATEST THREAT TO OUR PLANET IS THE BELIEF THAT SOMEONE ELSE WILL SAVE IT.

-ROBERT SWAN

INNOVATIONS - IOT

We offer our clients new smart building IoT technology.

Benefits of IoT include:

- Supplying live data to a personalised dashboard that can be accessed via your computer or mobile device
- Predicting, preventing and protecting M&E equipment from failing – saving companies thousands of pounds
- Sending alerts to prioritise jobs – enabling us to send the right technician

Using unique highly sensitive sensors to monitor:

- Energy consumption
- Occupancy
- Water temperatures for compliance
- Refrigerant pressures
- Emissions from gas boilers
- Water leaks
- Indoor air quality
- Chemical levels

CHARITIES & LOCAL COMMUNITIES

We are proud to support our local community and its charities. Helping others that need to be helped and making a difference within our community. Not only by raising much needed funds to support the amazing work they do but also by raising awareness.

Here are just a few of the charities that we support:

CARBON NEUTRAL

We are working with Neutral Carbon Zone to transition to a carbon neutral business. To efficiently and effectively monitor, report on and reduce the emissions of our entire value chain, with guidance and support through our net zero journey we will be able to achieve our environmental objectives. By becoming a NCZ member we gain control and visibility over the emissions generated by our company, services, and supply chain.

NCZ certification provides independent verification that internationally recognised calculation and reporting standards have been met, and industry best practice processes are being followed.
